

4 ways to conserve water in your bathroom

1

Check for toilet leaks by adding food coloring to the tank. If you have a leak, the color will appear in the bowl within 30 minutes.

2

Take shorter showers. Turn the water on to get wet; turn off to lather up; then turn the water back on to rinse.

3

Place a bucket in the shower to catch excess water for watering plants.

4

Don't let the water run while brushing your teeth, washing your face or shaving.
